

Multi-Metric Tradeoff Table

Compare quality, efficiency, cost, and robustness without flattening metric families.

Table 1: Quality–efficiency tradeoff summary. Arrows mark the desired direction.

System	Quality		Efficiency		Reliability	
	Score ↑	Gap ↓	Latency ↓	Cost ↓	Fail ↓	Stable ↑
Fast baseline	71.2	8.9	54	0.42	6.8	83.1
Large baseline	76.8	5.6	138	1.18	4.9	86.4
Guarded variant	78.1	4.8	91	0.76	3.7	88.2
Proposed system	80.5	3.9	74	0.63	2.8	90.6

Width policy: Grouped numeric table; compact columns for numbers and spanners for metric families.
