

Hyperparameter Sensitivity Table

Show robustness to thresholds, budgets, context lengths, or decoding settings.

Table 1: Sensitivity to the confidence threshold. The shaded row is the selected default.

Threshold	Coverage	Precision $\uparrow$	Recall $\uparrow$	Latency $\downarrow$
0.30	98.1	71.4	89.7	62
0.40	95.6	74.9	86.2	63
0.50	92.4	78.3	82.1	64
0.60	87.0	81.6	75.5	64
0.70	79.2	84.1	66.8	65

Width policy: Ordered natural-width table; highlight the selected/default row rather than every best value.
