

Data Split And Setup Table

Document train/dev/test/source composition and protocol notes.

Table 1: Data split and source-composition summary.

Source	Train	Dev	Test	Flagged	Protocol note
Dataset A	18,240	2,160	2,400	4.8%	Stratified by domain; no item appears in more than one split.
Dataset B	9,600	1,200	1,440	6.1%	Evaluation keeps the original class balance and reports flagged cases separately.
Dataset C	7,840	980	1,120	3.9%	Small domains are pooled only for reporting, not during model selection.
Total	35,680	4,340	4,960	5.0%	Totals are computed after deduplication and before task-specific filtering.

Width policy: tabularx with a real prose note column; counts stay compact.
