

# Leaderboard, Complexity, Or Resource Table

Rank systems while keeping resource and efficiency metrics visible.

Table 1: Leaderboard with resource context. Quality should not hide cost or latency.

| System            | Rank | Score ↑ | Params | Latency ↓ | Memory ↓ | Cost ↓ |
|-------------------|------|---------|--------|-----------|----------|--------|
| Compact baseline  | 4    | 71.8    | 1.3B   | 42        | 6.1      | 0.18   |
| Large baseline    | 2    | 78.9    | 13B    | 138       | 22.4     | 1.36   |
| Distilled variant | 3    | 76.4    | 3.2B   | 64        | 9.8      | 0.31   |
| Proposed system   | 1    | 81.2    | 4.1B   | 71        | 10.2     | 0.39   |

Width policy: Mostly numeric scorecard; natural width or tabular\* depending on column count.
